Practical Information

The screenshot shows the app's main interface for Saint Petersburg. It includes a gallery of images, a map with a blue location pin, weather information (2°C, 5 AM), and a scrollable list of nearby attractions. A detailed view of the Birzhevoy Bridge is also shown, including its name in Russian and a description.

- List of images related to the location
- Clickable map
- User destination point (from the attraction list)
- Current weather
- First three interesting attractions
- Interested attractions
- Scrollable list of images for an attraction
- An attraction description
- Distance from the location to an attraction
- Attraction image

Also we recommend using Tourist Assistant – TAIS app - a mobile tourist guide for Android devices. Based on your current location, events and recommendations of other tourists, the app provides the list of attractions around. You can see your location on the map, browse information about attractions located within walking distance, check photos, get weather updates, create route to the selected attractions and a lot more. The app aggregates information from all major sources, e.g., Wikipedia, Wikivoyage, Wikitravel, Google Place, etc.

April 5 (Wednesday)

Saint Petersburg State Electrotechnical University "LETI" campus, Building 5, ul. Prof. Popova, 5

09:30	1.5h	FRUCT Smart Spaces & IoT WG meeting , Public Relations department meeting room	
11:00	1h	20th FRUCT Conference Registration & Coffee	
Session: Official opening of the 20 th FRUCT conference			
Room:		Chairman: Sergey Balandin	
12:00	20m	Official opening of the 20 th FRUCT conference	
12:20	20m	Reserved for LETI and IEEE North-West Russia	
12:40	20m	Presentation of Dell EMC External Research & Academic Partnerships, Gennady Smorodin, Dell Technologies, Russia	
13:00	1h	Keynote talk: Role of m-Health in personalized medicine, Oleg Medvedev, Moscow State University, Russia	
14:00	20m	Coffee break	
Session: e-Healthcare Solutions I			
Room:		Chairman: Oleg Medvedev	
14:20	20m	Intelligent System for Blood Pressure Monitoring, by Aleksei Anisimov, Alyona Skorobogatova and Anastasiya Sutyagina, Saint-Petersburg Electrotechnical University "LETI", Russia	
14:40	20m	On the Semantic Approach to Service Development for Socio-Cyber-Medicine Systems, by Dmitry Korzun, Alexander Meigal, Alexander Borodin and Yulia Zavyalova, Petrozavodsk State University, Russia	
14:50	20m	Isometric-based Method for Hardware Automated Diagnostic of Functional Status of Central Nervous System, by Nikolay Safiannikov, Olga Bureneva Saint-Petersburg Electrotechnical University "LETI", and Zoya Aleksanyan, RAS Institute of the Human Brain, Russia	
15:20	20m	iPatient in Medical Information Systems and future of Internet of Health, by Olga Kolesnichenko, Security Analysis Bulletin, Gennady Smorodin, Dell EMC External Research and Academic Alliances, Andrey Mazelis, Alexander Nikolaev, Lev Mazelis, Vladivostok State University of Economics and Service, Alexander Martynov, Valeriy Pulit, SP.ARM, Yuriy Kolesnichenko, Cybersecurity Technology, Russia, and Sergey Balandin, FRUCT, Finland	
15:40	20m	Algorithms for ECG Analysis in Mobile Cardiac Monitoring System, by Aleksandr Kalinichenko, Svetlana Motorina, Saint-Petersburg Electrotechnical University "LETI", and Alexey Uskov, Medical project CardioQVARK, Russia	
16:00	20m	Coffee break	
Session: Software Design I		Session: Robotic systems	
Room:		Room:	
Chairman: Kirill Chuvilin		Chairman: Timofey Turenko	
16:20	20m	Source Code Quality Classification Based On Software Metrics, by Petr Vytovtov and Evgeny Markov, Kalashnikov ISTU, Russia	Modern Multi Robot SLAM approaches taxonomy, by Kirill Krinkin, Artyom Filatov and Anton Filatov, Saint-Petersburg Electrotechnical University "LETI", Russia
16:40	20m	Development of software for finding cutting and creasing lines on a corrugated cardboard web, by Anton Shabaev, Mikhail Probichev, Sergey Semanov, Petrozavodsk State University, and Ivan Raspopov, "Karton Optima" LLC, Russia	Software Platform for Development of Multimodule Robotic Systems with Asynchronous Multithreaded Control, by Arseniy Ivin and Daniil Mikhilchenko, SPIIRAS, Russia
17:00	20m	Method and Tools for Automated End-to-end Testing of Applications for Sailfish OS, by Ilya Paramonov, Andrey Vasilyev and Sergey Averkiev, Yaroslavl State University, Russia	Smartphone-Based Adaptive Remote Control Interface for Six-Wheeled Mobile Robot, by Mikhail Mironov, SPIIRAS, and Alexey Kashevnik, ITMO University, Russia

17:20	20m	Voice Assistant for Sailfish OS, by Petr Vytovtov, Kalashnikov ISTU, Russia	TRIK Studio: Technical Introduction, by Dmitry Mordvinov, Yurii Litvinov and Timofey Bryksin, St.-Petersburg State University, Russia
17:40	20m	An Application of Microservices Architecture Pattern to Create a Modular Computer Numerical Control System, by Maxim Ya. Afanasev, Yuri V. Fedosov, Anastasiya A. Krylova and Sergey A. Shorokhov, ITMO University, Russia	Ontology-Based Indirect Interaction of Users and Mobile Robots for Joint Activities, by Mikhail Petrov, ITMO University, and Alexey Kashevnik, SPIIRAS, Russia

Demo Session of the 20th FRUCT Conference

Time: 6 April 2017
Time: 18:00 – 21:00

Place: SPb ETU “LETI” campus, Building 5, ul. Prof. Popova, 5
Room: The main auditorium

The Demo section of the 20th FRUCT conference will be combined with the demo session of the Regional seminar on Mobile Healthcare, early diagnostics and fitness and with the conference social event. The first part is a promotional section to present/introduce demo projects to the public. Presentations will be done following the Pecha Kucha style. Main idea of this section is to make people aware of the demo and become interested to visit the demo stand at the second part of the session. During the second part of demo session teams get a place to install the demo and poster. If you have some special requirements please contact organizing committee by email info@fruct.org.

Pecha Kucha Presentation Format

Pecha Kucha is a presentation technique where a speaker shows a definite number of slides (usually 20 or 15), each for 20 seconds. The slides are changed automatically during the talk. The main intention for Pecha Kucha presentation style is to prevent participants from being too verbose and to make their talks more dynamic and impressive.

Pecha Kucha Night is an event where each speaker uses Pecha Kucha presentation, and speakers change each other in non-stop fashion. Initially invented by architects, this kind of event is often used to present creative projects or work; nowadays it is also used for R&D talks too. Pecha Kucha Night format allows all participants to make announcements about their demos in attractive and time-efficient way. That is why we have chosen this format for demo promotion section at FRUCT conference. More information can be found at <http://www.fruct.org/demo>.

How to prepare Pecha Kucha presentation

Here is an instruction on how to prepare your Pecha Kucha style presentation for Demo promotion section. Your presentation must contain exactly 6 slides, and each of them will be displayed for 20 seconds. The slides will be changed automatically. So, the whole presentation will take exactly 2 minutes (it should be noted that usually Pecha Kucha presentation has 20 slides, but we have to reduce the number due to a large amount of submitted presentations). Provide the information about yourself and your presentation on the first slide (name, institution, title of your presentation).

The main purpose of your talk would be to interest people, so your presentation should make absolutely clear the main ideas of your project and explain what you plan to show at the demo stand. Make your presentation fascinating to attract attendees and avoid technical details in your talk. Reveal one main idea on each slide. Do not overload your slides with information. Remember, that each slide is displayed only for 20 seconds. Place no more than 2 lines of text per slide, or one big picture. Avoid using slide titles. Do not duplicate the same slides in your presentation — it is cheating! If you see that 20 seconds for a particular slide is not enough for you, try to decouple it into the two or more, or omit the details. Do not place “Thank you” or “Q&A” slides in the presentation. Pecha Kucha session does not imply any questions from the auditory. All the questions will be asked afterwards in a poster room. Prepare your speech thoroughly and beforehand. As you have only 20 seconds per slide, it is quite impossible to improvise during the talk. Rehearse your speech several times to be sure in the absence of pauses when you wait for the slide change, or accelerations when you fails to follow your slides. Try to speak in the same pace during all the presentation. It definitely depends on your text, so try to prepare near the same amount of text in speech for each slide.

Check list

- Use exactly 6 slides.
- Place information about yourself and your presentation (name, institution) on the first slide.
- Reveal one main idea on each slide.
- Place no more than 2 lines of text or 1 large image per slide.
- Do not duplicate the same slides, do not place “Thank you” or “Q&A” slides in the presentation.
- Do not use any slide change animation.
- Prepare your speech thoroughly and do not forget to rehearse it.

CALL FOR PARTICIPATION

21st Conference of Open Innovations

Association FRUCT

Helsinki, Finland, 6-10 November 2017

Overview

FRUCT is the largest regional cooperation framework in form of open innovations between academia and industry. FRUCT conferences are attended by the representatives of more than 25 FRUCT member universities from Russia, Finland, Denmark, India, Italy and other countries, industrial experts from Dell EMC, Nokia, MariaDB, Intel, Jolla, Open Mobile Platform, Skolkovo and a number of guests from other companies and universities.

The conference is an R&D forum for the most active students, academic experts, industrial researchers and influential representatives of business and government. The conference invites the world-class academic and industrial researchers to give lectures on the most relevant topics, provides an opportunity for student teams to present progress and results of their R&D projects, meet new interesting people and form new R&D teams. The conference program consists of 3 to 5 intensive (½ or full day) trainings on the most promising technologies, plus 3 days of the main conference.

We warmly welcome all university research teams to participate in the conference, present your research and join the FRUCT Association. IEEE members and representatives of Russian and Finnish universities are entitled to large discounts. Registration to the conference is open at <http://www.fruct.org/conference21>.
